

# Fortune Cookies

## SUPPLIES AND TOOLS:

## SKILL LEVEL: Beginner

- POPTape™: Any colour! We used Loud Lime, Loud Lemon, Pinkalicious Pink, Plummy Plum Purple, Lagoon Blue, Dynamite Red & Paint Splats.
- Scissors/Craft Knife.

### Step 1

Cut or tear 2 x 10cm pieces of any colour POPTape. Lay them side by side sticky side up on your work surface joining them with a 5mm overlap.

### Step 2

Tear another 2 pieces the same size and lay them sticky side down over the first pieces to create a double sided rectangle of POPTape. Trace an 8cm circle onto your POPTape and cut it out.

### Step 3

Tear or cut a small 2cm strip of tape in the same colour. To create the "cookie" shape, fold the circle in half so you have a semi-circle. Pinch the centre of the fold together with your fingers, open up the sides so you can stick the tape inside the semi-circle. You will need to attach the tape across the fold you have created. Make sure the tape is above the fold not right in the crease. See image 3.

### Step 4

Open up the semi-circle and fold back the edges so the tape you have just put inside is now on the outside. Tear another 2cm strip of tape. Take the bottom 2 sides of the semi-circle where the crease is from the last fold and join them together with the small piece of tape to close the cookie. See image 4. Use your fingers inside the cookie shape to push out the sides and give your cookie a rounded shape. Write your fortunes or jokes on 8cm strips of paper and slide them through the gap.

Note: These make great gift boxes for small items like lollies or candy canes at Christmas time.
