

# Gift Box

## SUPPLIES AND TOOLS:

- POPTape™: Chasing Rainbows.
- Scissors/Craft Knife.
- A5 size Paper Card or Thin Cardboard.

## SKILL LEVEL: Beginner

### Step 1

Cover one side of your paper card with Chasing Rainbows POPtape. Ensure that you line up each new section of tape with the rainbow pattern on the previous piece of tape.

### Step 2

On the reverse side, trace your gift box template as per the image. Ours is 11.5cm wide and 14.5cm long (7cm for each panel & 0.5cm allowance for the folded flap at the end).

### Step 3

Cut around the outline of your template and create the folds as shown by the dotted lines in the image. Cut a 6cm x 1cm piece of tape to secure the side tab.

#### Step 3.1

To create the curved folds at the ends of the box, make the panel into a curve and fold along the curve.

### Step 4

Fold in the sides of your gift box and secure the side tab with the piece of tape. Fold in the ends to complete your gift box.

Note: To insert your gift item just open the flaps at one end, insert the gift then fold the flaps back in to close the box.
