

# Hair Bow

## SUPPLIES AND TOOLS:

- POPTape™: Pinkalicious Pink, Polar White, Magical Unicorns.
- Non-stick Scissors/Craft Knife.

## SKILL LEVEL: Beginner

### Step 1

To create the POPTape fabric for the bow, cut or tear 2 x 12cm lengths of Pinkalicious Pink POPTape, and lay them side by side on your work surface with a 5mm overlap to join them on the long side. Tear another 12cm length of Pinkalicious Pink tape and lay it sticky side down on the top row of your other 2 pieces.

### Step 2

Fold the bottom piece of tape over exactly in half to join the sticky sides together.

### Step 3

To create the white fabric, lay 2 x 10cm lengths of white tape side by side on your

work surface with a 5mm overlap to join them on the long side. Tear another 10cm length of tape and lay it sticky side down on the top row of your other 2 pieces. Fold the bottom piece  $\frac{3}{4}$  of the way over to join the sticky sides together. You should now have 3 pieces of fabric in 3 different sizes. Trim them to tidy them up if required.

### Step 4

To create the folds in your bow, take each piece of fabric and fold lengthways in

narrow rows pressing firmly to create the fold lines as you go. The folds will not stay in place until you join the bow together in Step 6.

### Step 5

For the centre tie piece, tear a 10cm piece of pink tape and cut off a 15mm wide strip. Tear a 10cm piece of white tape and cut off a 5mm wide strip to lay down the centre of the pink strip. Cut another 5mm wide strip from the white tape and fold it in half lengthways to join the sticky sides together. Make a small loop and join the ends with a small piece of tape so you have a complete circle. This is the loop for attaching your bow to your hair clip or head-

band. Stick the loop to one end of the pink & white strip. You may need to adjust the location as you attach your tie piece to your bow.

### Step 6

To join your bow together, lay your 3 pieces of fabric one on top of the other, pink on the bottom, then white, then unicorns on top. Squeeze them together in the centre and firmly wrap around the tie piece several times to secure the bow in the centre. Start from the end without the loop and as you get closer to the end of your tie piece make sure the loop is positioned at the back of the bow before you stick it down.
