

Plaited Bracelets

SUPPLIES AND TOOLS:

SKILL LEVEL: Beginner

- POPTape™: Any colour/pattern. We used Zig & Zag, Loud Lime, Let's Go Banana's.
- Non-stick Scissors/Craft Knife.
- 2 x 10mm strong magnets (optional).

Step 1

Cut or tear a 20cm piece of POPTape in each of the colours you want to use.

Step 2

Fold each section of tape in half lengthways sticky sides together so you have a double sided strip of tape. Cut into 3 equal strips. Note: if you want a wider plaited bracelet cut into 2 strips or leave full width.

Step 3

Lay 3 sections of tape onto your work surface and secure them all at the top end with a strip of POPTape - this will keep them secure whilst you are plaiting. Plait the strips by bringing the outside strip to the middle switching sides as you go.

Step 4

When you have finished the plaiting, measure your bracelet on your wrist and trim if required. The bracelet should be long enough to go around your wrist if you are using the magnets to join the ends. If you are not using magnets, keep the bracelet long enough to go over your hand. Lay one magnet on each end of the bracelet, tear or cut a 1.5cm section of tape to secure the

ends of the bracelet with the magnet inside. Note. If you are not using the magnets to open and close your bracelet, make it into a circle then secure the ends together with a strip of tape.
